SUMMARY

Product, strategy, and operations leader with experience owning ML-driven risk and fraud platforms end to end in regulated, high-stakes environments. Initiates and leads cross-functional programs across data science, engineering, compliance, and go-to-market teams, translating model logic and quantitative tradeoffs into clear direction for technical and non-technical audiences, from live incident response to long-term platform strategy.

EXPERIENCE

AVP, Product Strategy

Bank of America | New York City

Sept 2024 - April 2026

SQL, SAS, Tableau, Excel

- Owned end-to-end health and performance of the wire fraud detection engine as product lead, driving roadmap, rule strategy, and delivery.
- Partnered with data science to ship ML model features and optimize real-time detection, preventing **eight figures in monthly customer losses**.
- Led a rule revamp and model transition from logistic regression to XGBoost, aligning engineering, data science, and operations on test design and staged rollout.
- Built a weekly rule-optimization program using a composite performance methodology, systematically tuning and retiring underperforming rules while lowering false positives.
- Partnered with Zelle and ACH product teams to align cross-product fraud strategy on shared detection infrastructure.
- Balanced enforcement against user experience during live fraud attacks, partnering with executives to deploy mitigations while preserving industry-leading false positive rates.

Fraud Data Analyst

Forter | Tel Aviv

Dec 2022 - May 2024

SQL, Snowflake, Tableau, Qlik, Excel, Jira

- Managed analytics for a merchant fraud dispute platform, owning the chargeback and dispute resolution lifecycle across major card networks, **recovering eight figures in revenue**.
- Led product strategy for dispute automation, partnering with vendors and internal teams to design and launch a scalable, low-touch resolution workflow end to end.
- Partnered with Customer Success Managers to streamline client data-sharing and integrations, increasing client detection performance by 20%.
- Used advanced SQL and quantitative analysis to refine detection rule logic and improve ML model performance, and built executive dashboards translating dispute analytics into cross-functional fraud strategy.

Data Analyst

Apple (via Cprime) | Cupertino

April 2021 - April 2022

SQL, Tableau, Excel

- Led search performance optimization to improve search relevance for **500M+ users globally** across Apple Music and the App Store.
- Defined product health metrics and monitoring frameworks that gave analysts and engineers clear criteria to detect, validate, and remediate regressions at scale.
- Mentored and evaluated a 20-person QA analyst team on large-scale data evaluation and pipeline quality workflows.
- Diagnosed root causes of product regressions and partnered with engineering to drive fixes.

Data and Business Analyst

SolarLeadFactory LLC (acquired by Enphase Energy) | San Francisco

May 2019 - April 2021

SQL, R, Stata, Excel

- Founding data hire; built the company's analytics methodology and data strategy from the ground up.
- Built forecasting models for solar adoption, increasing conversion predictability by **30%**.
- Influenced marketing strategy by tying adoption behavior to long-term profitability, boosting sales **15%**, and built cost-benefit models translating utility rates and incentives into customer ROI projections.

SKILLS

Data & Tools: SQL, Snowflake, SAS, Stata, R, Tableau, Qlik, Excel, Jira, Confluence, AI/LLM tooling

Risk & Fraud: Detection rule strategy, ML risk scoring (logistic regression, XGBoost), account takeover, chargebacks & disputes, false-positive management, live incident response

Product & Program: End-to-end product ownership, roadmap definition, cross-functional leadership, vendor management, executive communication, process automation

EDUCATION

University of California, Berkeley

B.S., Environmental Economics & Policy

Languages: English, Hebrew, Spanish

LEADERSHIP

Haverim Mehaltzim, Co-founder

Volunteer-led search and rescue initiative supporting families during emergencies.

Abraham Tent Program, Co-founder

Support framework and workshops for groups experiencing grief.
