LEADERSHIP

Haverim Mehaltzim | Co-founder

- Co-founded Haverim Mehaltzim, a volunteer search and rescue network that has grown to 450 members across 42 countries and supported 210+ emergency events worldwide
- Set the founding vision, identified systemic gaps in existing rescue systems, and built the scalable response frameworks that underpin the organization's operations

Abraham Tent Program | Co-founder

- Co-founded the Abraham Tent Program, a structured grief support initiative that has reached 780 participants across 58 groups
- Influenced founding principles, facilitated workshops, and supported organizational operations

Languages: English, Hebrew, Spanish

ABOUT

Product, program, and strategy leader with 6+ years building risk and fraud programs from zero to scale across banking, e-commerce, and consumer tech. Pairs technical depth in data and ML with business judgment, and leads through listening, empathy, and trust to bring engineering, data science, compliance, operations, and clients together around shared goals. Co-founded two nonprofits in emergency response and grief support, growing a 450-member network across 42 countries and a program that has reached 780 participants.

EXPERIENCE

AVP, PRODUCT STRATEGY

Tools: SQL, SAS, Tableau, Excel

Bank of America | New York City

Sept 2024 – April 2026

- Owned the wire fraud detection program end-to-end, from strategy and roadmap to delivery
- Led ML model transition from logistic regression to XGBoost, managing stakeholder alignment, testing, and rule overhaul across engineering, data science, and operations
- Ran weekly rule review meetings, tuning and retiring rules to reduce false positives
- Built automated reporting with AI and LLM tooling across rule performance and loss metrics
- Initiated cross-product fraud strategy deployments with Zelle and ACH teams
- Coordinated rapid cross-functional response during live attacks, deploying mitigations
- Coached the Operations team through contested case reviews to close the feedback loop

FRAUD DATA ANALYST

Tools: SQL, Snowflake, Tableau, Qlik, Excel, Jira, Confluence

Forter | Tel Aviv

Dec 2022 – May 2024

- Spearheaded product strategy and vendor partnerships to automate claim disputes at scale
- Managed analytics across concurrent workstreams, driving eight-figure revenue recovery
- Executed detection strategies supporting first-party decisioning to probabilistic scoring
- Partnered with Customer Success Managers and enterprise clients to streamline data sharing and integrations, increasing client fraud detection performance by 20%
- Built executive dashboards that informed roadmap priorities and cross-functional planning

DATA ANALYST

Tools: SQL, Tableau, Excel

Apple (via Cprime) | Cupertino

April 2021 – April 2022

- Partnered with Engineering on feature prioritization for search quality improvements for 500M+ users, translating findings into structured cross-functional delivery plans and goals
- Led and mentored a team of 20 QA analysts across large-scale data evaluation projects
- Defined product health metrics and monitoring frameworks to detect regressions at scale
- Coordinated cross-functional remediation of product issues, managing root cause analysis, stakeholder communication, and resolution tracking from identification to deployment

DATA and BUSINESS ANALYST

Tools: SQL, R, Stata, Excel

SolarLeadFactory LLC (Acquired by Enphase Energy) | San Francisco

May 2019 – April 2021

- Joined as founding data hire and built the analytics function and methodology from zero
- Built forecasting models for solar adoption, increasing conversion predictability by 30%
- Created cost-benefit models for solar installations, translating utility rate trends, incentives, and geospatial data into ROI projections showing an average of 20% savings for users
